

DNA-STP-78-DR

78-pos Terminal Panel for PowerDNA Layers

- 78-pin D-Sub male connector
- Three 27-position terminal blocks (JT1, JT2, JT3)
- Uses DNA-CBL-78 when connecting to PowerDNA layers
- For mounting on 35 x 7.5 mm DIN rail

The DNA-STP-78-DR provides easy screw terminal connections for all DNA and DNR series I/O boards which utilize the 78-pin connector scheme. The DNA-STP-78-DR is connected to the I/O board via DNA-CBL-78 series cables.

Technical Specifications:

Connectors	DB-78 - 78-pin male D-Sub; 3 x 27-position terminal blocks;
Screw Terminal Wire Sizes	12 - 24 AWG
Inter-terminal isolation	>350 Vrms
Operating Temp	- 20°C to 50°C
Dimensions	169w x 72d x 77h mm
