

INTERFACE ROUTING BOARDS FOR EVERY APPLICATION NEED

COMMERCIAL OR MILITARY
SUPPORT FOR A WIDE VARIETY OF SYSTEMS

United Electronic Industries (UEI) offers a wide range of commercial and military-grade interface boards designed for diverse systems and applications to route your signals where they need to be using your connectors. With the flexibility to support the customization to match your system's needs, UEI ensures reliable, high-performance connectivity across industries like aerospace, defense, and more.

Variety of Connectors

Options include DB37, DB62, MIL-DTL-38999, MIL-DTL-26482 series and more connectors for a broad range of military applications to match your existing cabling.

Seamless Integration

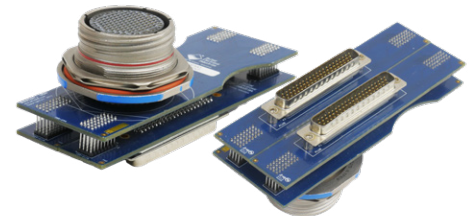

Our custom interface boards easily convert DB37 and DB62 connectors to your connector, offering enhanced flexibility. Re-use existing cables with commercial-off-the-shelf (COTS) hardware as the base.

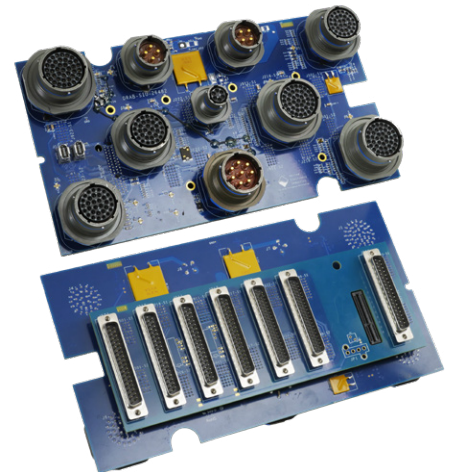

Customizable Solutions

UEI's rugged interface boards are designed to meet the specific needs of military-grade systems, enabling efficient, adaptable connectivity for any environment.

Standard COTS Interface

LCAC SIU Interface

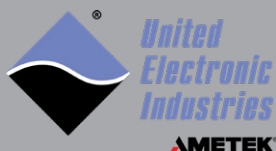

And many more options available!

WHY CHOOSE UEI?

Unmatched Flexibility: Our connector solutions adapt to your unique requirements.

Durability & Reliability: Built to withstand the harshest conditions, ensuring optimal performance in mission-critical applications.

First-Class Support: Our knowledgeable and responsive support team is ready to assist you with your application.
