# Accessories for PowerDAQ PDL-DIO Boards
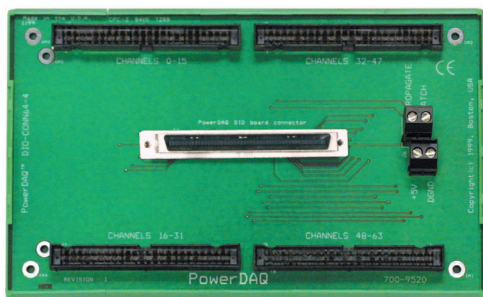

10-Year Availability Guarantee

PDL-DIO-STP-64 Screw-Terminal Panel

The PDL-DIO-STP-64 is a 64-channel screw terminal panel, which also includes connections to the counter/timers, high-speed IRQ and ESSI ports.

PDL-DIO-STP-64 ....64 channels

PDL-DIO-CONN64-4 Distribution Board

The PD2-DIO-CONN distributes the 64 I/O lines into four sets of 16 I/O lines via a 50-pin industry standard IDC connector. These connectors can attach directly to standard relay boards. Use the PDL-DIO-CBL-96CE to connect PowerDAQ Lab DIO board to the PDL-DIO-CONN device.

PDL-DIO-CBL-96CE Cable

96-way pinless, round shielded cable with metal cover plates. Use this cable to connect a PowerDAQ PDL-DIO series board to any PDL-DIO accessories with 96-way connector. It includes two Fujitsu FCN-247J096-G/E connectors. (CE Certified)

PDL-DIO-CBL-96CE.. 1m

Ordering Information:

Product	Description
PDL-DIO-STP-64	64-channel screw-terminal panel
PDL-DIO-CONN64-4	Distribution board (converts 96-way connector to four 50-way industry standard IDC header connectors)
PDL-DIO-CBL-96CE	96-way cable to interface PDL-DIO-64 to PDL-DIO-STP-64. CE Certified
PDL-DIO-CBL-37	37-way male to female cable to interface PDL-DIO-64 CTR, interrupts, control and ESSI lines to PDL-DIO-STP-64
PDL-DIO-CBL-DBG	DSP firmware debug cable kit
